

HLA-A*011:01 KRAS G12V Recombinant Protein | KRAS recombinant protein

Biotinylated HLA-A*011:01 KRAS G12V peptide complex

CATALOG #	HOST
AAA76370	HEK cells (Note: Host protein expression may be lot-specific and can be subject to change during production, including bulk orders.)

PRODUCT SYNONYMS

HLA-A*011:01 KRAS G12V; Biotinylated HLA-A*011:01 KRAS G12V peptide complex; KRAS recombinant protein

PRODUCT SPECIFICATIONS

Host	HEK cells (Note: Host protein expression may be lot-specific and can be subject to change during production, including bulk orders.)
Purity/Purification	purity was determined to be >95% by nonreducing PAGE and HPLC
Form/Format	Recombinant HLA-A*011:01 KRAS G12V complex was lyophilized from 0.2 um filtered PBS solution pH7.4
Source	DNA sequence encoding the Human (HLA-A*011:01) AA25-305 [accession# P04439] and the B2M protein AA2-119 [accession# P61769], fused to the mutant G12V KRAS epitope VVVGADGVGK. This complex includes a C terminal polyHis and was expressed in HEK cells, This protein was then biotinylated site specific using the AVitag biotinylation technology
Endotoxin	Endotoxin content was assayed using a LAL gel clot method. Endotoxin level was found to be less than 0.1 ng/ug (1EU/ug).
Reconstitution	A quick spin of the vial followed by reconstitution in distilled water to a concentration not less than 0.1 mg/mL. This solution can then be diluted into other buffers.
Preparation and Storage	The lyophilized protein is stable for at least 2 years from date of receipt at -20 degree C.

IMAGES

SDS-PAGE

Biotinylated KRAS G12V (HLA-A*11:01) protein PAGE 1ug loaded Tris-Bis PAGE under reducing condition. The purity is greater than 95%.

Application Data

Biotinylated KRAS G12V (HLA-A*11:01) HPLC The purity of KRAS G12V (HLA-A*11:01) complex was greater than 95% as determined by SEC-HPLC.

ADDITIONAL INFORMATION

Product Categories/Family for KRAS recombinant protein

MHC peptide complexes

NCBI AND UNIPROT INFORMATION

Molecular Weight	Recombinant HLA-A/KRAS G12V has a calculated mass of approximately 50kDa. Due to glycosylation migrates as an approximately 60 kDa protein under reducing conditions in SDS-PAGE.
------------------	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
