

Rabbit anti Monkey IgG (Fc specific) Secondary Antibody

Rabbit anti Monkey IgG (Fc specific)

CATALOG # AAA77607	HOST Rabbit	REACTIVITY Monkey	APPLICATIONS Immunoprecipitation
------------------------------	-----------------------	-----------------------------	--

PRODUCT SYNONYMS

Rabbit anti Monkey IgG (Fc specific); Polyclonal Secondary Antibody; Rabbit anti Monkey IgG (Fc specific) secondary antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Monkey
Clonality	Polyclonal
Specificity	Precipitating polyclonal Rabbit antiSerum to Monkey IgG, Fc specific
Applicable Applications for Rabbit anti Monkey IgG (Fc specific) secondary antibody	IP (Immunoprecipitation)
Reactivity Note	The antiSerum does not cross react with any other component of the Monkey immunoglobulin system. Inter-species cross-reactivity is a normal feature of antibodies to immunoglobulins, since Ig of different species frequently share antigenic determinants. Precipitation reactions have been observed with IgG in Serum of other old-world Monkeys, including Cercopithecus, Cynomolgus and baboon. The antiSerum may also react with IgG of other species as has been observed for Chimpanzee and man.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Product Categories/Family for Rabbit anti Monkey IgG (Fc specific) secondary antibody	Antisera
---	----------

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
