

Human PTH ELISA Kit | PTH elisa kit

PTH ELISA Kit

CATALOG #
AAA77715

REACTIVITY
Human

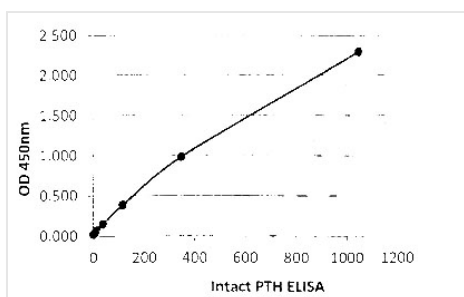

PRODUCT SYNONYMS

PTH; PTH ELISA Kit; PTH ELISA; PTH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	190
Samples	Insulin Elisa Kit Is Intended For The Quantitative Measurement Of Insulin In Human Serum Or Plasma
Assay Type	Quantitative Sandwich
Preparation and Storage	Product should be stored at 2-8 degree C. Product is stable for 24 months from the date of manufacturing.

ADDITIONAL INFORMATION

Related Product Information for PTH elisa kit

Intended Uses: Insulin ELISA Kit is intended for the quantitative measurement of Insulin in human serum or plasma.

Principle of the Assay: Insulin ELISA is based on solid phase sandwich ELISA method. The samples and conjugate reagent (anti-Insulin biotin & HRP) are added to the wells coated with Streptavidin. Insulin in the patient's serum binds to the matched pair Abs, forming a sandwich complex and simultaneously the complex is being immobilized on the plate through streptavidin-biotin interactions. Unbound protein and HRP conjugate are washed off, through a washing step. Upon addition of the substrate, the intensity of color is proportional to the concentration of Insulin in the samples. A standard curve is prepared by relating the color intensity to the concentration of Insulin.

NCBI AND UNIPROT INFORMATION

NCBI GI #	222420251
UniProt Accession #	B9DLD9
Molecular Weight	21,544 Da

NCBI Official Full Name	pth
UniProt Protein Name	Peptidyl-tRNA hydrolase
UniProt Gene Name	pth
UniProt Synonym Gene Names	PTH
UniProt Entry Name	PTH_STACT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
