

Human ANA Screen IgG ELISA Kit

ANA Screen IgG ELISA Kit

CATALOG #
AAA77717

REACTIVITY
Human

PRODUCT SYNONYMS

ANA Screen IgG; ANA Screen IgG ELISA Kit; ANA IgG ELISA; ANA Screen IgG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Human serum or plasma
Preparation and Storage	Product should be stored at 2-8 degree C. Product is stable for 24 months from the date of manufacturing.

ADDITIONAL INFORMATION

Related Product Information for ANA Screen IgG elisa kit	Intended Uses: ANA Screen ELISA test system is an enzyme-linked immunosorbent assay (ELISA) for the detection of IgG class antibodies to ANA in human serum or plasma. Principle of the Assay: Diluted patient serum is added to wells coated with purified nuclear antigens. ANA IgG specific antibody, if present, binds to the antigen. All unbound materials are washed away and the enzyme conjugate is added to bind to the antibody-antigen complex, if present. Excess enzyme conjugate is washed off and substrate is added. The plate is incubated to allow the hydrolysis of the substrate by the enzyme. The intensity of the color generated is proportionai to the amount of IgG specific antibody in the sample.
Product Categories/Family for ANA Screen IgG elisa kit	Autoimmune Disorders

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
