

## Human Mycoplasma IgM ELISA Kit

Mycoplasma IgM ELISA Kit

CATALOG #  
**AAA77743**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Mycoplasma IgM; Mycoplasma IgM ELISA Kit; Mycoplasma IgM ELISA; Mycoplasma IgM elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                                                       |
| Samples                 | Human serum or plasma                                                                                                                                                                                                       |
| Intended Uses           | The Mycoplasma pneumoniae (M. pneumoniae) IgM ELISA test system is an enzyme linked immunosorbent assay (ELISA) for the detection of IgM class antibodies to M. pneumoniae in human serum or plasma. For research use only. |
| Preparation and Storage | Product should be stored at 2-8 degree C. Product is stable for 24 months from the date of manufacturing.                                                                                                                   |

### ADDITIONAL INFORMATION

|                                                           |                    |
