|------------------------------|---------------------|----------------------------|------------------------------|

### PRODUCT SYNONYMS

Goat Anti-Human lambda (lambda chain specific); Polyclonal Secondary Antibody; Goat Anti-Human Lambda-HRP; Goat Anti-Human Lambda - HRP; Goat Anti-Human lambda (lambda chain specific) secondary antibody

### PRODUCT SPECIFICATIONS

|                                                                                               |                                                                                                                                                                                                |
|-----------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                                                                                          | Goat                                                                                                                                                                                           |
| Reactivity                                                                                    | Human                                                                                                                                                                                          |
| Clonality                                                                                     | Polyclonal                                                                                                                                                                                     |
| Isotype                                                                                       | IgG                                                                                                                                                                                            |
| Specificity                                                                                   | Reacts with human lambda light chains as demonstrated by ELISA and flow cytometry                                                                                                              |
| Purity/Purification                                                                           | Affinity chromatography on pooled human Igs with lambda light chains covalently linked to agarose                                                                                              |
| Form/Format                                                                                   | Horseradish Peroxidase (HRP) Conjugate                                                                                                                                                         |
| Applicable Applications for Goat Anti-Human lambda (lambda chain specific) secondary antibody | ELISA                                                                                                                                                                                          |
| Source                                                                                        | Pooled antisera from goats hyperimmunized with human myeloma proteins with lambda light chains                                                                                                 |
| Cross Absorption                                                                              | Pooled human myeloma proteins with kappa light chains                                                                                                                                          |
| Characterization                                                                              | To ensure lot-to-lot consistency, each batch of product is tested by ELISA, Fluorescent ELISA, and/or flow cytometry for conformance to characteristics of a standard reference reagent.       |
| Cross Adsorption                                                                              | Human kappa light chains; may react with lambda light chains from other species.                                                                                                               |
| Preparation and Storage                                                                       | The horseradish peroxidase (HRP) conjugate is supplied as 1.0 mL of stock solution in 50% glycerol/50% PBS, pH 7.4. No preservative added. Store at 2-8 degree C or long-term at -20 degree C. |

### ADDITIONAL INFORMATION

|                                                                                                 |                                                |
