

Rat neuroglobin ELISA Kit | NGB elisa kit

Rat Neuroglobin, NGB ELISA Kit

CATALOG #
AAA80695

REACTIVITY
Rat

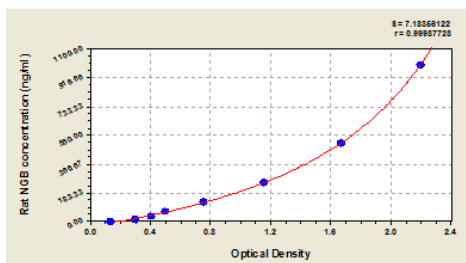

PRODUCT SYNONYMS

neuroglobin; Rat Neuroglobin; NGB ELISA Kit; NGB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of rat NGB. No significant cross-reactivity or interference between rat NGB and analogues was observed.
Sequence Length	151
Samples	Serum, plasma, cell culture supernates, tissue homogenates
Assay Type	Sandwich
Detection Range	15.6 ng/ml -1000 ng/ml.
Sensitivity	The minimum detectable dose of rat NGB is typically less than 3.9 ng/ml. The sensitivity of this assay, or Lower Limit of Detection (LLD) was defined as the lowest protein concentration that could be differentiated from zero. It was determined the mean O.D value of 20 replicates of the zero standard added by their three standard deviations.
Intra-assay Precision	Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.
Inter-assay Precision	Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for NGB elisa kit	Principle of the assay: This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for NGB has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any NGB present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for NGB is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of NGB bound in the initial step. The color development is stopped and the intensity of the color is measured.

NCBI AND UNIPROT INFORMATION

NCBI GI #	126723275
NCBI GeneID	100008868
NCBI Accession #	NP_001075602.1
NCBI GenBank Nucleotide #	NM_001082133.2
UniProt Accession #	Q6EV97
Molecular Weight	17,040 Da
NCBI Official Full Name	neuroglobin
NCBI Official Symbol	NGB
NCBI Protein Information	neuroglobin
UniProt Protein Name	Neuroglobin
UniProt Gene Name	NGB
UniProt Entry Name	NGB_RABIT

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
