

IgG Fab fragment Native Protein

Mouse IgG Fab fragment

CATALOG # AAA81641	HOST Mouse serum IgG digested with papain	APPLICATIONS Western Blot, ELISA
------------------------------	---	--

PRODUCT SYNONYMS

IgG Fab fragment; Mouse IgG Fab fragment; IgG Fab fragment native protein

PRODUCT SPECIFICATIONS

Host	Mouse serum IgG digested with papain
Purity/Purification	Greater or equal to 85% purity as determined by SDS-PAGE.
Form/Format	Liquid
Applicable Applications for IgG Fab fragment native protein	WB (Western Blot), ELISA
Storage Buffer	PBS
Preparation and Storage	Aliquot and store at -20 degree C or -80 degree C. Avoid repeated freeze / thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for IgG Fab fragment native protein

The fragment antigen-binding (Fab fragment) is a region on an antibody that binds to antigens. It is composed of one constant and one variable domain of each of the heavy and the light chain. These domains shape the paratope — the antigen-binding site — at the amino terminal end of the monomer. The two variable domains bind the epitope on their specific antigens.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
