

Mouse Glucose Oxidase ELISA Kit | GOD elisa kit

Mouse Glucose Oxidase ELISA Kit

CATALOG #
AAA82012

REACTIVITY
Mouse

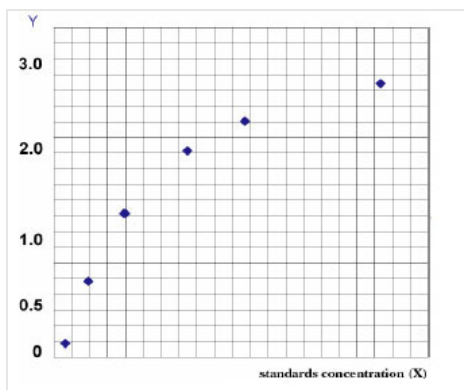

PRODUCT SYNONYMS

Glucose Oxidase; Mouse Glucose Oxidase ELISA Kit; GOD elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GOD elisa kit

Intended Uses: This GOD ELISA kit is intended Laboratory for research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of GOD in the sample, this GOD ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versus GOD concentration. The concentration of GOD in the samples is then determined by comparing the O.D. of the samples to the standard curve.

Principle of the Assay: This GOD enzyme linked immunosorbent assay applies a technique called a quantitative sandwich immunoassay. The microtiter plate provided in this kit has been pre-coated with a monoclonal antibody specific for GOD. Standards or samples are then added to the microtiter plate wells and GOD if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of GOD present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for GOD are added to each well to "sandwich" the GOD immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, A and B substrate solution is added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain GOD and enzyme-conjugated antibody will exhibit a change in colour. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the colour change is measured spectrophotometrically at a wavelength of 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	58585090
NCBI GeneID	406081
NCBI Accession #	NP_001011574.1
NCBI GenBank Nucleotide #	NM_001011574.1
NCBI Official Full Name	glucose oxidase
NCBI Official Synonym Full Names	glucose oxidase<
NCBI Official Symbol	LOC406081
NCBI Official Synonym Symbols	GB19418
NCBI Protein Information	glucose oxidase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
