

Rat Platelet factor 3 ELISA Kit | PF3 elisa kit

Rat Platelet factor 3 ELISA Kit

CATALOG #
AAA83435

REACTIVITY
Rat

PRODUCT SYNONYMS

Platelet factor 3; Rat Platelet factor 3 ELISA Kit; PF3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Detection Range	5.0-100 ng/mL
Sensitivity	1.0ng/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PF3 elisa kit	For Sample Serum, plasma, cell culture supernatants, body fluid and tissue homogenate INTENDED USE This PF-3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat PF-3. This ELISA kit for research use only! PRINCIPLE OF THE ASSAY PF-3 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PF-3 antibody and an PF-3-HRP conjugate. The assay sample and buffer are incubated together with PF-3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PF-3 concentration since PF-3 from samples and PF-3-HRP conjugate compete for the anti-PF-3 antibody binding site. Since the number of sites is limited, as more sites are occupied by PF-3 from the sample, fewer sites are left to bind PF-3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PF-3 concentration in each sample is interpolated from this standard curve.
Product Categories/Family for PF3 elisa kit	Cardiovascular

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
