

Rabbit Osteocalcin ELISA Kit | OC elisa kit

Rabbit Osteocalcin ELISA Kit

CATALOG #
AAA83834

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Osteocalcin; Rabbit Osteocalcin ELISA Kit; OC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	2.5-50ng/mL
Sensitivity	0.1ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses||This OC ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit OC. This ELISA kit for research use only!

Principle of the Assay: OC ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-OC antibody and an OC-HRP conjugate. The assay sample and buffer are incubated together with OC-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the OC concentration since OC from samples and OC-HRP conjugate compete for the anti-OC antibody binding site. Since the number of sites is limited, as more sites are occupied by OC from the sample, fewer sites are left to bind OC-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The OC concentration in each sample is interpolated from this standard curve.
