

Rat Anti-thyroid-globulin antibody ELISA Kit | ATGA/TGAB elisa kit

Rat Anti-thyroid-globulin antibody ELISA Kit

CATALOG #
AAA84719

REACTIVITY
Rat

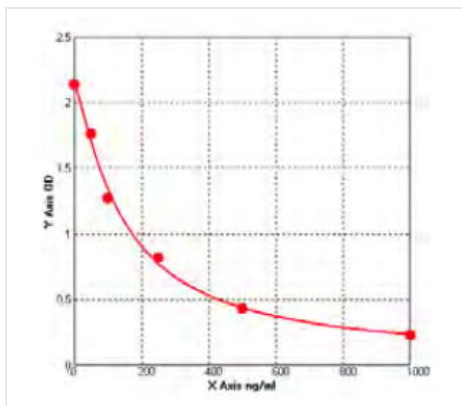

PRODUCT SYNONYMS

Anti-thyroid-globulin antibody; Rat Anti-thyroid-globulin antibody ELISA Kit; ATGA/TGAB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of TGA _b . No significant cross-reactivity or interference between TGA _b and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between TGA _b and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ATGA/TGAB elisa kit	Principle of the Assay: TGAAb ELISA kit applies the competitive enzyme immunoassay technique utilizing Thyroid Globulin antigen and an TGAAb-HRP conjugate. The assay sample and buffer are incubated together with TGAAb-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TGAAb concentration since TGAAb from samples and TGAAb-HRP conjugate compete for the Thyroid Globulin antigen binding site. Since the number of sites is limited, as more sites are occupied by TGAAb from the sample, fewer sites are left to bind TGAAb-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TGAAb concentration in each sample is interpolated from this standard curve. Intended Uses: This TGAAb ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat TGAAb. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for ATGA/TGAB elisa kit	Immunology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
