

Rabbit Alkaline Phosphatase ELISA Kit | ALP elisa kit

Rabbit Alkaline Phosphatase ELISA Kit

CATALOG #
AAA84789

REACTIVITY
Rabbit

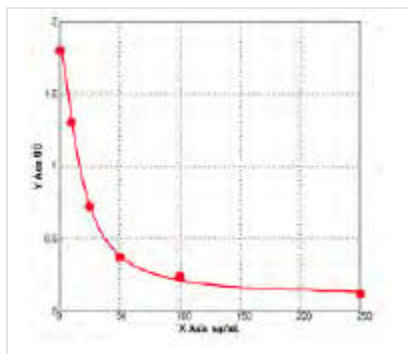

PRODUCT SYNONYMS

Alkaline Phosphatase; Rabbit Alkaline Phosphatase ELISA Kit; ALP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Specificity	This assay has high sensitivity and excellent specificity for detection of ALP. No significant cross-reactivity or interference between ALP and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between ALP and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive or Sandwich
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ALP elisa kit	Intended Uses: This ALP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit ALP. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: ALP ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-ALP antibody and an ALP-HRP conjugate. The assay sample and buffer are incubated together with ALP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ALP concentration since ALP from samples and ALP-HRP conjugate compete for the anti-ALP antibody binding site. Since the number of sites is limited, as more sites are occupied by ALP from the sample, fewer sites are left to bind ALP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ALP concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	178462
NCBI GeneID	249
Molecular Weight	51,045 Da
NCBI Official Full Name	alkaline phosphatase
NCBI Official Synonym Full Names	alkaline phosphatase, liver/bone/kidney
NCBI Official Symbol	ALPL
NCBI Official Synonym Symbols	HOPS; TNAP; APTNAP; TNSALP; AP-TNAP
NCBI Protein Information	alkaline phosphatase, tissue-nonspecific isozyme; glycerophosphatase; tissue-nonspecific ALP; alkaline phosphomonoesterase; liver/bone/kidney-type alkaline phosphatase; alkaline phosphatase liver/bone/kidney isozyme
UniProt Protein Name	Alkaline phosphatase, tissue-nonspecific isozyme
UniProt Gene Name	ALPL
UniProt Synonym Gene Names	AP-TNAP; TNSALP
UniProt Entry Name	PPBT_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
