

Human Melanoma metastasis surface adhesion molecule ELISA Kit | MMSAM elisa kit

Human Melanoma metastasis surface adhesion molecule ELISA Kit

CATALOG #
AAA85221

REACTIVITY
Human

PRODUCT SYNONYMS

Melanoma metastasis surface adhesion molecule; Human Melanoma metastasis surface adhesion molecule ELISA Kit; MMSAM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	0.5-10ng/mL
Sensitivity	0.1ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for MMSAM elisa kit	For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate INTENDED USE This MMSAM ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human MMSAM. This ELISA kit for research use only! PRINCIPLE OF THE ASSAY MMSAM ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-MMSAM antibody and an MMSAM-HRP conjugate. The assay sample and buffer are incubated together with MMSAM-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the MMSAM concentration since MMSAM from samples and MMSAM-HRP conjugate compete for the anti-MMSAM antibody binding site. Since the number of sites is limited, as more sites are occupied by MMSAM from the sample, fewer sites are left to bind MMSAM-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The MMSAM concentration in each sample is interpolated from this standard curve.
Product Categories/Family for MMSAM elisa kit	Cell Biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
