

Human C+B137atestatin ELISA Kit | CST elisa kit

Human C+B137atestatin ELISA Kit

CATALOG #
AAA85586

REACTIVITY
Human

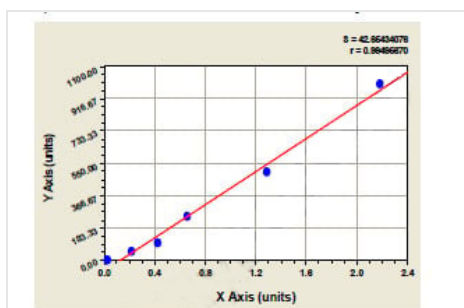

PRODUCT SYNONYMS

C+B137atestatin; Human C+B137atestatin ELISA Kit; CST elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Sensitivity	1.0 pg/mL.
Intended Uses	This CST ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human CST. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for CST elisa kit

Principle of the Assay: CST ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for CST. Standards or samples are then added to the microtiter plate wells and CST if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of CST present in the sample, a standardized preparation of horseradish peroxidase (HRP) -conjugated polyclonal antibody, specific for CST are added to each well to "sandwich" the CST immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain CST and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CST concentration in each sample is interpolated from this standard curve.

Product Categories/Family for CST elisa kit

Neurobiology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
