

Human Insulin like Growth Factor beta1 ELISA Kit | ILGF beta1 elisa kit

Human Insulin like Growth Factor beta1 ELISA Kit

CATALOG #
AAA86744

REACTIVITY
Human

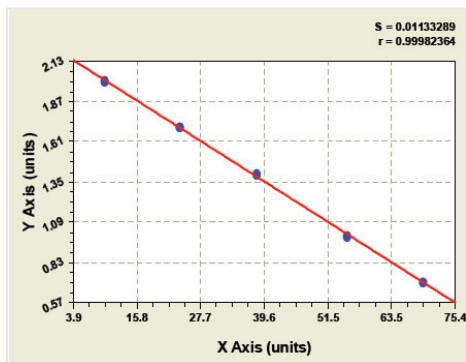

PRODUCT SYNONYMS

Insulin like Growth Factor beta1; Human Insulin like Growth Factor beta1 ELISA Kit; Human Insulin like Growth Factor b1 ELISA Kit; ILGF beta1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	50-1000pg/mL
Sensitivity	1.0pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This IGF-B1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human IGF-B1. This ELISA kit for research use only!

Principle of the Assay: IGF-B1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-IGF-B1 antibody and an IGF-B1 -HRP conjugate. The assay sample and buffer are incubated together with IGF-B1 -HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the IGF-B1 concentration since IGF-B1 from samples and IGF-B1 -HRP conjugate compete for the anti-IGF-B1 antibody binding site. Since the number of sites is limited, as more sites are occupied by IGF-B1 from the sample, fewer sites are left to bind IGF-B1 -HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The IGF-B1 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
