

Chicken Dihydrotestosterone ELISA Kit | DHT elisa kit

Chicken Dihydrotestosterone ELISA Kit

CATALOG #
AAA90122

REACTIVITY
Chicken

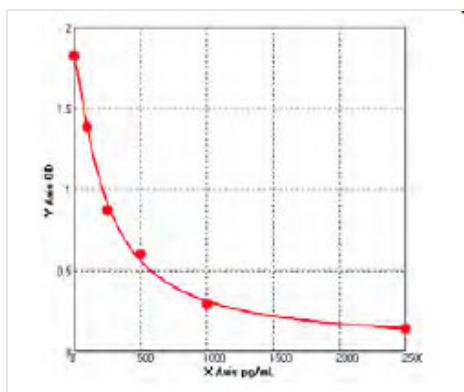

PRODUCT SYNONYMS

Dihydrotestosterone; Chicken Dihydrotestosterone ELISA Kit; DHT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of DHT. No significant cross-reactivity or interference between DHT and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between DHT and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for DHT elisa kit	Principle of the Assay: DHT ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-DHT antibody and an DHT-HRP conjugate. The assay sample and buffer are incubated together with DHT-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the DHT concentration since DHT from samples and DHT-HRP conjugate compete for the anti-DHT antibody binding site. Since the number of sites is limited, as more sites are occupied by DHT from the sample, fewer sites are left to bind DHT-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The DHT concentration in each sample is interpolated from this standard curve. Intended Uses: This DHT ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken DHT. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	339503844
NCBI GeneID	10950710
NCBI Accession #	YP_004691264.1
NCBI GenBank Nucleotide #	NC_015730.1
NCBI Official Full Name	D-hydantoinase/dihydropyrimidinase Dht
NCBI Official Symbol	dht
NCBI Protein Information	D-hydantoinase/dihydropyrimidinase Dht

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
