

Sheep Tenascin X ELISA Kit | TNX elisa kit

Sheep Tenascin X ELISA Kit

CATALOG #
AAA91160

REACTIVITY
Sheep

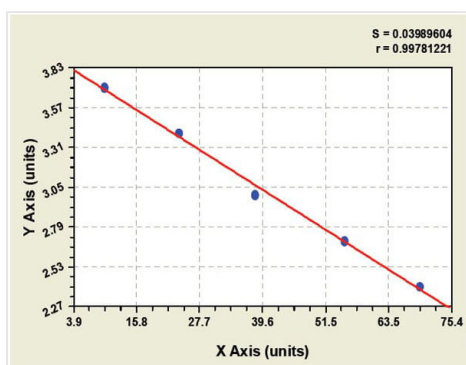

PRODUCT SYNONYMS

Tenascin X; Sheep Tenascin X ELISA Kit; TNX elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Sheep
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 pg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

INTENDED USE This TNX ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Sheep TNX. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY TNX ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TNX antibody and an TNX-HRP conjugate. The assay sample and buffer are incubated together with TNX-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TNX concentration since TNX from samples and TNX-HRP conjugate compete for the anti-TNX antibody binding site. Since the number of sites is limited, as more sites are occupied by TNX from the sample, fewer sites are left to bind TNX-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TNX concentration in each sample is interpolated from this standard curve.
