

Chicken Complement 1 Inhibitor ELISA Kit | C1INH) elisa kit

Chicken Complement 1 Inhibitor ELISA Kit

CATALOG #
AAA91662

REACTIVITY
Chicken

PRODUCT SYNONYMS

Complement 1 Inhibitor; Chicken Complement 1 Inhibitor ELISA Kit; C1INH) elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Intended Uses	This C1INH ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken C1INH. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for C1INH) elisa kit

Principle of the Assay: C1INH ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-C1INH antibody and an C1INH-HRP conjugate. The assay sample and buffer are incubated together with C1INH-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the C1INH concentration since C1INH from samples and C1INH-HRP conjugate compete for the anti-C1INH antibody binding site. Since the number of sites is limited, as more sites are occupied by C1INH from the sample, fewer sites are left to bind C1INH-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The C1INH concentration in each sample is interpolated from this standard curve.
