

Canine Glypican 2 ELISA Kit | GPC2 elisa kit

Canine Glypican 2 ELISA Kit

CATALOG #
AAA92094

REACTIVITY
Canine

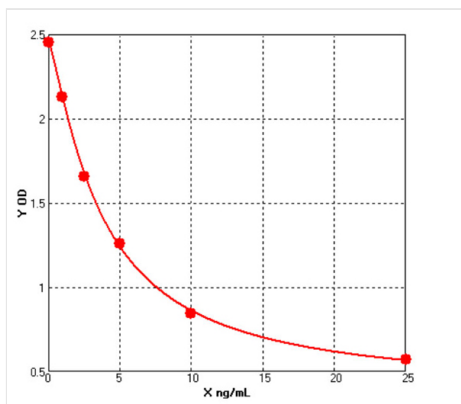

PRODUCT SYNONYMS

Glypican 2; Canine Glypican 2 ELISA Kit; GPC2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of GPC2. No significant cross-reactivity or interference between GPC2 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between GPC2 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/ml
Intended Uses	This GPC2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine GPC2. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GPC2 elisa kit	Principle of the Assay: GPC2 ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-GPC2 antibody and an GPC2-HRP conjugate. The assay sample and buffer are incubated together with GPC2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GPC2 concentration since GPC2 from samples and GPC2-HRP conjugate compete for the anti-GPC2 antibody binding site. Since the number of sites is limited, as more sites are occupied by GPC2 from the sample, fewer sites are left to bind GPC2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GPC2 concentration in each sample is interpolated from this standard curve. Intended Uses: This GPC2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine GPC2. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	22749459
NCBI GeneID	221914
NCBI Accession #	NP_689955.1
NCBI GenBank Nucleotide #	NM_152742.1
Molecular Weight	62,830 Da
NCBI Official Full Name	glypican-2
NCBI Official Synonym Full Names	glypican 2
NCBI Official Symbol	GPC2
NCBI Protein Information	glypican-2; cerebroglycan; glypican proteoglycan 2, cerebroglycan proteoglycan
UniProt Protein Name	Glypican-2
UniProt Gene Name	GPC2
UniProt Entry Name	GPC2_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
