

Chicken Osteoprotegerin ELISA Kit | OPG elisa kit

Chicken Osteoprotegerin ELISA Kit

CATALOG #
AAA92791

REACTIVITY
Chicken

PRODUCT SYNONYMS

Osteoprotegerin; Chicken Osteoprotegerin ELISA Kit; OPG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Intended Uses: This OMT-1 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human OMT-1. This ELISA kit for research use only!

Principle of the Assay: OMT-1 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-OMT-1 antibody and an OMT-1-HRP conjugate. The assay sample and buffer are incubated together with OMT-1-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the OMT-1 concentration since OMT-1 from samples and OMT-1-HRP conjugate compete for the anti-OMT-1 antibody binding site. Since the number of sites is limited, as more sites are occupied by OMT-1 from the sample, fewer sites are left to bind OMT-1-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The OMT-1 concentration in each sample is interpolated from this standard curve.
