

Monkey Erythropoitin ELISA Kit | EPO elisa kit

Monkey Erythropoitin ELISA Kit

CATALOG #
AAA93088

REACTIVITY
Monkey

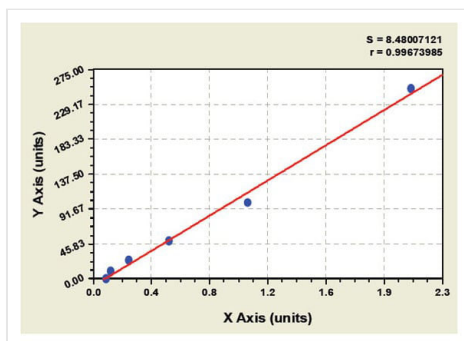

PRODUCT SYNONYMS

Erythropoitin; Monkey Erythropoitin ELISA Kit; EPO elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Detection Range	2.5-50mIU/mL
Sensitivity	1.0mIU/mL
Intended Uses	This EPO ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey EPO. This ELISA kit for research use only, not for therapeutic applications
!Intended Uses	This EPO ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey EPO. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for EPO elisa kit	Principle of the Assay: EPO ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for EPO. Standards or samples are then added to the microtiter plate wells and EPO if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of EPO present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for EPO are added to each well to "sandwich" the EPO immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain EPO and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The EPO concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	62240997
NCBI GeneID	2056
NCBI Accession #	NP_000790.2
NCBI GenBank Nucleotide #	NM_000799.2
Molecular Weight	21,307 Da
NCBI Official Full Name	erythropoietin
NCBI Official Synonym Full Names	erythropoietin
NCBI Official Symbol	EPO
NCBI Official Synonym Symbols	EP; MVCD2
NCBI Protein Information	erythropoietin; epoetin
UniProt Protein Name	Erythropoietin
UniProt Gene Name	EPO
UniProt Entry Name	EPO_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
