

Chicken Exendin 4 ELISA Kit | EXENDIN-4 elisa kit

Chicken Exendin 4 ELISA Kit

CATALOG #
AAA93708

REACTIVITY
Chicken

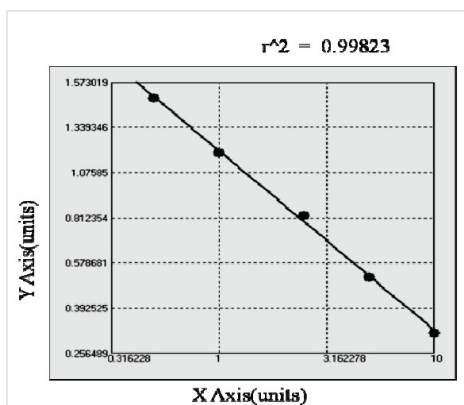

PRODUCT SYNONYMS

Exendin 4; Chicken Exendin 4 ELISA Kit; EXENDIN-4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This Exendin 4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken Exendin 4. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for EXENDIN-4 elisa kit

Principle of the Assay: Exendin 4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-Exendin 4 antibody and an Exendin 4 -HRP conjugate. The assay sample and buffer are incubated together with Exendin 4 -HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Exendin 4 concentration since Exendin 4 from samples and Exendin 4 -HRP conjugate compete for the anti-Exendin 4 antibody binding site. Since the number of sites is limited, as more sites are occupied by Exendin 4 from the sample, fewer sites are left to bind Exendin 4 -HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Exendin 4 concentration in each sample is interpolated from this standard curve.
