

Monkey Eosinophil colony stimulating factor ELISA Kit | EOS-CSF elisa kit

Monkey Eosinophil colony stimulating factor ELISA Kit

CATALOG #
AAA93993

REACTIVITY
Monkey

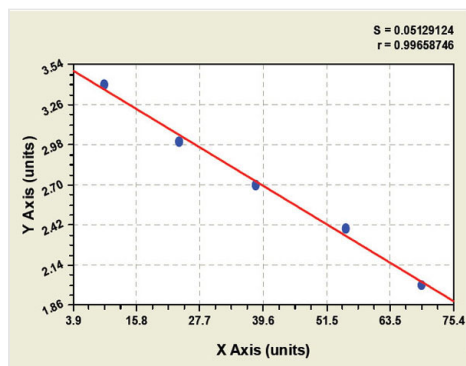

PRODUCT SYNONYMS

Eosinophil colony stimulating factor; Monkey Eosinophil colony stimulating factor ELISA Kit; EOS-CSF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Intended Uses	This EOS-CSF ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey EOS-CSF. This ELISA kit for research use only, not for therapeutic applications
Intended Uses	This EOS-CSF ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey EOS-CSF. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for EOS-CSF elisa kit

Principle of the Assay: EOS-CSF ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-EOS-CSF antibody and an EOS-CSF-HRP conjugate. The assay sample and buffer are incubated together with EOS-CSF-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the EOS-CSF concentration since EOS-CSF from samples and EOS-CSF-HRP conjugate compete for the anti-EOS-CSF antibody binding site. Since the number of sites is limited, as more sites are occupied by EOS-CSF from the sample, fewer sites are left to bind EOS-CSF-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The EOS-CSF concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
