

Rabbit Anti-purkinje cell Antibodies/Anti-Yo ELISA Kit | PCA elisa kit

Rabbit Anti-purkinje cell Antibodies/Anti-Yo ELISA Kit

CATALOG #
AAA96461

REACTIVITY
Rabbit

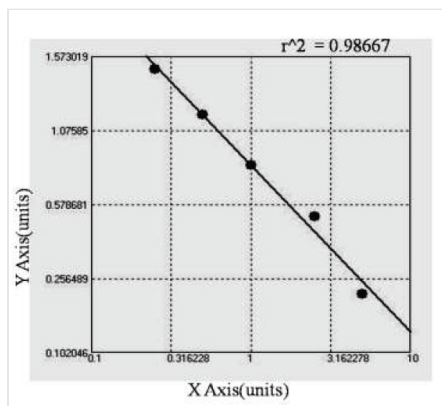

PRODUCT SYNONYMS

Anti-purkinje cell Antibodies/Anti-Yo; Rabbit Anti-purkinje cell Antibodies/Anti-Yo ELISA Kit; PCA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	5-100ng/mL
Sensitivity	1.0ng/mL
Intended Uses	This Anti-PCA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit Anti-PCA. This ELISA kit for research use only, not for therapeutic applications
!Intended Uses	This Anti-PCA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit Anti-PCA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PCA elisa kit	Principle of the Assay: Anti-PCA ELISA kit applies the competitive enzyme immunoassay technique utilizing purkinje cell antigen and an Anti-PCA-HRP conjugate. The assay sample and buffer are incubated together with Anti-PCA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Anti-PCA concentration since Anti-PCA from samples and Anti-PCA-HRP conjugate compete for the purkinje cell antigen binding site. Since the number of sites is limited, as more sites are occupied by Anti-PCA from the sample, fewer sites are left to bind Anti-PCA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Anti-PCA concentration in each sample is interpolated from this standard curve.
Product Categories/Family for PCA elisa kit	Cell Biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
